

Unscopables

Object instead of Array

```
Array.prototype[Symbol.unscopables] = {  
  find: true,  
  findIndex: true,  
  ...  
};
```

Walk the `[[Prototype]]` chain

For:

- `HasBinding`
- `GetBindingValue`

But not for:

- `SetMutableBinding`

Setter issue

SetMutableBinding ignores @@unscopables so we can get a mismatch:

```
with (object) {  
  x = 1;  
  assert(x === 1); // Can fail  
}
```

Globals & Unscopables?

The global object is an ObjectEnvironment too
